HISTORY

Aeroklas Co Ltd is a member of the Eastern Polymer Group (EPG) and has been producing finished rubber and plastic products for over 35 years.

In 1996 the company expanded its business into producing pick-up truck bed liner under the Aero liner and Hero liner brands and is now recognized as the leading manufacturer Automotive Accessory.

The company has now diversified to cover a range of car and pick-up truck accessory products for both Thailand and overseas markets.

OUR RECOGNITION

Aeroklas pays great attention to every aspect that contributes to the success of each process including production, quality, manpower and factory excellence. This thoroughness has enabled us to be accepted as one of the works top ranking auto accessory companies.

Accepted by the world's leading brands

Ford, Honda, Isuzu, Mazda, Mitsubishi, Nissan, Toyota, GM, and VW.

We are also the sole distributor of the leading automotive brands.

Are you ready to join us in fulfilling the needs of the automobile industry?

*"AS LONG AS THE WORLD CONTINUES TO TURN,
AS LONG AS THE AUTOMOBILE INDUSTRY CONTINUES TO INNOVATE,
AEROKLAS WILL ENDEAVOR TO CREATE NEW DREAMS TO SATISFY THE
NEEDS AND IMAGINATION OF THE AUTO WORLD TODAY AND EVERY DAY."*

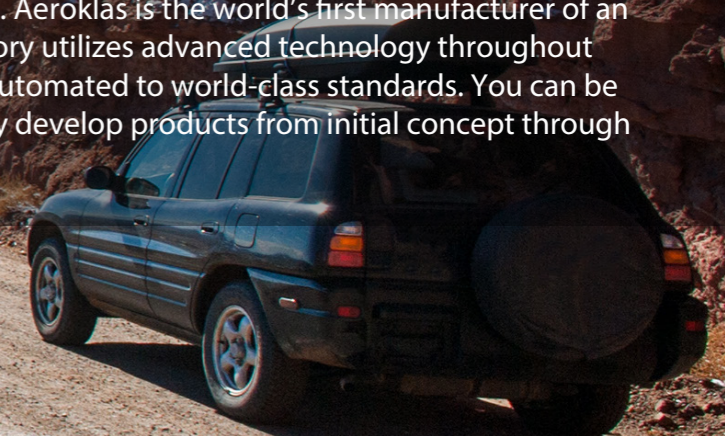

OUR DESIGN & TECHNOLOGY

Product Design & Development Department

At Aeroklas we never stop innovating to meet the demands of the automobile industry. We devote our time and pay attention to every detail in creating new innovative auto accessories. Our skill in design has been recognized by the 'Prime Minister's Export Award for the Best Design.'

Product Research and Development Department

The vital department helps developing new materials and production processes for the manufacturing of innovative new products. Aeroklas is the world's first manufacturer of an ABS double shell canopy. Our modern factory utilizes advanced technology throughout the facility and the production processes, automated to world-class standards. You can be confident in Aeroklas's ability to completely develop products from initial concept through to mass production.

SUMMARY

Aeroklas are on the cutting edge of canopy manufacturing and development being the first company in the world to offer Engineered ABS Double Shell Canopies.

Both the inner and outer shells are moulded together to bring you twice the strength and durability then a single skinned canopy, featuring a higher impact resistance and ability to reshape after impact.

Available in dual and space cab, the Aeroklas canopy is painted using OE quality paint giving it such a perfect, glossy and flawless finish.

FEATURES AND BENEFITS

Twice the strength of a single skin canopy

Strong, lightweight, ability to reshape following impact

Both shells are thermoformed from a single piece of ABS with no joins or weak areas.

Easy clean, odor free smooth finish interior

Track mount or self support roof racks available (Tested to ISO AS1235-2000 & City Crash Tested)

Sliding or drop down front window allows easy cleaning & additional ventilation.

Sliding or lift up side windows / tinted safety glass

Single handle slam shut rear door, keyed alike to side windows

LED high mounted stop lamp

LED interior light with rear door switch

Simple Plug & Play wiring kit

All Aeroklas canopies have been water tested

Drop and pendulum tested to 250kgs

✓ Aeroklas warranty covers three years for the inner and outer shell and twelve months for components

Rear sliding window

Rear Lockable Handle

Interior Dome Light

C-Clamps

Inner Shell/Interior

Track Mount Canopy Roof Bars

SUMMARY

Bed liners are protective coatings that shield the inner-side of a truck bed from damage and also create a skid resistant surface allowing any cargo to stay in place, depending on circumstances.

The Aeroklas bed liner is made of a premium grade High-Density-Polyethylene (HDPE). HDPE is a very robust and flexible material. The strength and durability of this material eliminates all risk of the bed liner chipping or cracking.

The quality of Aeroklas bed liners is at the highest level of protection for your valued pickup bed. Capable of withstanding excessive forces and high resistance to scratches.

FEATURES & BENEFITS

Made of premium grade High-Density-Polyethylene (HDPE); robust yet flexible.

Patented Aeroklas installation system- no drilling required

Long-lasting with UV protective agent blended in with the material

The tail gate area is rubber sealed. Reduces friction between the bed and the door, which help reduces the chance of rust.

Innovatively designed for perfect fitting with all models

Products are certified by well-known institutes with global standard

Environmental friendly material guaranteed by Green Label Thailand

COMPOSITE HOOK SYSTEM

The Aeroklas composite hook has been developed from special material that has been patented by Aeroklas.

This light weight material is tough, durable and won't rust. It also offers resistant to chemicals such as hydrochloric acid and sodium hydroxide. The composite hook systems tension capacity is 350kg.

A modern design with no drill installation which can be install to all truck models with an over rail bedliner.

SUMMARY

The Aviator is just like your ordinary Aeroklas deck lid, supported with gas struts for the same durable lift and close feature, advanced locking system to assure your belongings remain safe and of course maintaining that stylish pickup truck look.

Perhaps you're looking for change, or something a little more practical for your day-to-day life.

Look no further, because Aeroklas's Aviator is here and it's taking deck lids to a whole new level.

Not only do you get the same practicality of a normal deck lid, but with the push of a electronic button/switch your truck bed space is only seconds away from being limited to limitless.

Electronically heighten the lid to the roof height of your vehicle for space to play with.

This of course allows you to carry taller items than your ordinary deck lids.

However the lift-up feature is not just a stationary show off, but can be driven in it's lift up feature up to 80kmh.

FEATURES AND BENEFITS

Made from engineered polymer, the same material used in the aerospace industry

No drill installation with a clamp lock kit

Light weight, only 35 kgs

Easy to remove and re-install yourself (D.I.Y), when you need to carry high loads

With electronic control button, simple to raise and lower

2 lock positions and able to lift the shell up to the horizontal level

Small fitting kit, giving generous space

Strong and secure lock to protect your belongings

Weather protection with high quality rubber seal

Convenient and easy to use

Fuel saving, low profile and aero-dynamic design, lighter weight than others, improving

✓ fuel economy Available with 2 textures: black leather grain and factory painted OE quality paint

Roof Height Lift Up

100% Waterproof Rubber Sealing

Strong Key Lock

Strong & Secure Lock System

ABS Grain Finish

SUMMARY

The speed lid is a light weight solution to covering and securing the load bed, weighing in at only 28Kg this is one of the lightest covers on the market. Not only is the Speed lid light weight, by covering the load bed your saving yourself money by reducing air resistance and improving your MPG.

The Aeroklas speed lid features a manual lift-up to 60cm in conjunction with its tough shock absorbers. The speed also includes a fuel saving, low profile and aerodynamic design that helps maintain your trucks pick-up look.

Simple to install using the Aeroklas clamp system means no drilling is required to the truck bed. The speed lid can be manually removed and installed in under twenty minutes, giving you complete control of your valued vehicles space.

FEATURES AND BENEFITS

Made from engineered polymer, the same material used in the aerospace industry

No drill installation with a clamp lock kit

Light weight, only 28kgs

Easy to remove and re-install yourself (D.I.Y)

Open and close easily with gas struts

Small fitting kit giving generous space

Strong and secure lock technique to protect your belongings

Weather protection with a high quality rubber seal

Convenient and easy to use

Fuel saving, low profile and aero-dynamic design, lighter weight than others, improving fuel economy

Paintable in any colour you desire

Made from Engineered polymer

Able to lift up to 60cm

Strong and Secure lock

Robust and Durable

Latches to locking plate

Gas strut supported

SUMMARY

Manufactured using the same twin skinned polymer used in production of aviation parts, Aeroklas are roundly known worldwide for their quality of 4WD Accessories they produce.

The galaxy deck lid maintains your pickup trucks look with a 45-degree opening lid supported by gas struts. Securing your belongings beneath the durable locking system the Galaxy delivers; Aeroklas deck lids require a no drilling installation to your valuable pickup bed.

Available for Ford PX Ranger, Mazda BT50, Volkswagen Amarok, Isuzu D-MAX & Holden Colorado.

Aeroklas OE Sports bar compatibility only for Ford PX Ranger.
Other sports bars are incompatible.

FEATURES AND BENEFITS

Install with clamp lock kit, no need to drill the truck box.

Easy to remove and re-install (D.I.Y).

Manual lift up with tough shock up absorber.

Small installation kit causes extra space.

Strong and secure lock technique to protect your belongings.

Weather protection with high quality rubber seal.

Fuel saving, low profile, aerodynamic design and lightweight.

Available in Black Leather Grain texture.

✓ Available with stainless steel styling bar.

SUMMARY

FEATURES AND BENEFITS

Helps protect equipment and valuables from theft, rain and dust

Product designed and manufactured in Australia

Features elasticised bungee looping

Provides maximum space utilisation

Versatile quick tie down application

Helps restrain load in event of an accident

Durable materials suited for Australian conditions providing protection from the elements, UV resistant, rip resistant with rot proof bonded nylon

Security locking – anti theft as standard

Light weight can be easily removed when required

3 year manufacturer's warranty

SUMMARY

The same design functionality used for windshield shade screens has now been brought to the camping tent world with amazing results. Set up a tent in one minute's time with no poles to monkey around with. Family camping has never been this easy.

The Pop Up Tent is designed with a condensation vent that prevents moisture from accumulating on the tent's inner walls. The tent features no-see-um mesh windows and doors with glow-in-the-dark zipper pulls. Storm covers can be closed for weather protection and privacy.

This water resistant tent is great for adults and perfect for introducing kids to camping. When it is folded down and stored in the carry bag it is easy to keep in your vehicle for spontaneous camping or use at festivals.

FEATURES AND BENEFITS

Dimensions: 90" L x 72" W x 42" H

Water resistant fabric with tape sealed seams

PE floor material; no ground tarp is necessary

Condensation vent

(2) windows and (1) door with no-see-um mesh and storm covers

Folds down to a 25" diameter circle with a weight of 4.75 lbs.

Carry bag with sewn-in set up guide

Large size; sleeps (2) adults

Includes: tent, stakes, carry bag, and sewn-in set up guide

GLADIATOR UTE-BOX

The Gladiator ute-box puts your valued truck bed to use with its extensive storage capabilities. Manufactured using high quality MDPE (Medium Density Polyethylene) the material gives the box incredible durability whilst it is extremely light weight.

MDPE is a UV resistant material which increases the life span of these boxes helping them age well over long periods of time.

The gladiator includes a central opening lid that can be manually raised and lowered or kept open using its 'stay open' feature. Inside the box there are two removable trays that are used to categorise your smaller items followed by the bigger storage space for larger items below.

To assure your belongings are kept safe, the gladiator Ute box delivers the best in protection with its advanced key locking system.

The Aeroklas Gladiator comes in three different sizes;

Medium Size (M)

Capacity: 165 ltr

Dimension (W x L x H) 547 x 1350 x 490 mm

Large Size (L)

Capacity: 200 ltr

Dimension (W x L x H) 547 x 1419 x 538 mm

Extra Large Size (XL)

Capacity: 220 ltr

Dimension (W x L x H) 589 x 1470 x 540 mm

TRINITY UTE-BOX

The Trinity ute-box is the most uniquely designed with its modern and stylish appearance in the Ute box family. Although the trinity and gladiator appear to look the same, some features differentiate the two as individuals.

The trinity Ute box features a 3 way opening lid (Full lid central opening / gull wing doors) that allows you to add or remove items from the box on three separate angles. This durable storage compartment features a no drill installation to your vehicle.

Aeroklas Australia has developed a new and innovative bracketing system for the Trinity Ute box that allows the box to be fitted to your vehicle securely. This of course prevents the box from moving around as well as delivering a higher theft protection for your valuables.

Simply by hooking on to either sides of the tub, the bracket allows the box to be attached or removed from the vehicle easily.

Available only in one standard size;

Dimension (W x L x H) 610 x 1460 x 530 mm.

Capacity: 210 litres

Weight: 21kg

AEROKLAS BY RHINO RACK CANOPY ROOF BARS

Rhino-Rack has been creating world-class roof racks since 1992. Today Rhino Rack is the proud owner of Australia's most diverse and innovative range of roof rack products; supply high quality gear to all industry segments.

Aeroklas is excited to announce the release of our new Canopy Roof Bar System; Aeroklas By Rhino Rack. Fully engineered to carry up to 80kgs on the roof of an Aeroklas Canopy, the new roof rack system makes it easy to mount an awning or carry larger items.

FEATURES & BENEFITS

Developed in conjunction with Rhino Rack, Australia's leading roof rack manufacturers

Fully engineered up to 80kgs, depending on Canopy model

Tested to AS1235-2000

Track mounts allow easy adjustment of roof bar position to suit your needs

Roof bars can be easily removed when not required, leaving the low profile track in place

Full kit includes a pair of tracks, Vortex roof bars, track legs and full fitting instructions

Compatible with a large range of Rhino accessories, including the Pioneer Platform

Available to suit the full range of Aeroklas Canopies

HEAVY DUTY ROOF BARS

Utilising our tough Heavy Duty bars, this system offers you compatibility with a wide selection of Rhino-Rack accessories. So whether you're a traveller, cyclist, surfer or tradesperson – the Heavy Duty 2500 roof rack system has you covered.

- Removable
- Easy to install / remove
- Security fasteners
- Strong and built to last
- Compatible with a wide range of accessories
- Tested and approved to meet Australian Standards AS1235-2000

VORTEX ROOF BARS

With special moulded pads and custom-fit clamps tailored to fit your vehicle's door jamb curves, the Vortex 2500 roof rack is secure, strong and efficient. You can really relax behind the wheel knowing that your gear is safe.

Utilising our highly regarded Vortex bars, this system offers you compatibility with a wide selection of Rhino-Rack accessories. So whether you're a traveller, cyclist, surfer or tradesperson – the Vortex 2500 roof rack system has you covered.

"Aeroklas is a Distributor of All Rhino Rack Products".
